

Most people who have gotten sick with this coronavirus have had a mild case.

And there aren't a lot of cases in kids. If kids do get the virus, it tends to be very mild.

It's a word you might have heard at school or online or on T.V.

This coronavirus is a newly discovered virus. It causes a disease called COVID-19.

People who are much older or who already have health problems are more likely to get sicker with coronavirus.
